Thursday Maths 3 Star

Using your Bar Chart from yesterday interpret the information you have presented in a paragraph.

Include facts about:

How many rainbows were spotted altogether?
What scale did you use? Why?
Which street had the most/least rainbows?
How many more/less were spotted in certain streets?
Did any streets have half or quarter as many as another street, if so which ones?
(For example did one have 10 and another have 5 or 16 in one and 4 in another)
