

WILL YOU PLEASE JOIN US AND HELP RAISE **£500,000** TO SEND ZAC FOR PIONEERING MEDICAL TREATMENT?

Four-year-old Zac Oliver, from Broseley, has an extremely rare and aggressive form of leukaemia. In fact, he is the only child in the UK suffering with this form of the disease. Zac requires essential life-saving treatment - but as you can see from the introduction above, it is expensive.

That is why a number of fundraising events have been organised – many involving Zac’s favourite colour, red – to contribute towards that £500,000 target.

To discover more about the appeal, and help dinosaur-loving Zac reach his goal, visit:
