

Tuesday | Star Maths

This week you are going to calculate some perimeters. Later in the week you will be using this knowledge and skills to design your own zoo or farm!

To get us started I would like you to have a go at these questions in your Maths Book:

Draw these out using 1 square per metre. What is the perimeter?

1. A barn has a length of 10m and a width of 5m
2. The field with the cows in is a square and each side is 15m
3. The pig sty is the shape below with the following measurements:

Each side of this shape is of equal length.
The perimeter is 60 cm.
How long is each side?
Explain how you got your answer.
