

Friday Maths 2 Star

Design a Menu for an Ice Cream Van!

Due to limited stock you only have 3 flavours of ice cream (you can choose these), 1 sauce and a flake.

Create as many different combinations for your customers to choose from.

How many can you find?

Start with one scoop, one scoop plus sauce and so on. If you want to make it more challenging add an extra flavour of ice cream.

Complete in your books. You can use the template like below to present your work:

(P.S. Can you guess which flavour is Mrs Kuczynska's favourite?)
