

## Tuesday Maths - All

Below are 3 Job Descriptions (details of a job) read through them and decide which job you would like to have.

Challenge 1: Have you guessed what the jobs are doing? Write down which one you have chosen and why you think you would like it the most?

### Job A

You only have to work  
ONCE a week!

This job involves getting  
wet, having lots of fun with  
soapy water and hardly any  
clearing up.

You will only need to get a  
bucket of soapy water and a  
sponge so very little to clear  
away as well.

What more could you want?

### Job B

*This job will only take you about 15 minutes three times a week, with the added opportunity to earn a bonus if you can work an extra 15 minutes now and again. You need to be organised and know where things are kept in your home. If you can do this, this job is perfect for you!*

*No equipment or preparation is needed, all you need is time!*

### Job C

*This daily job will only take you about 20 minutes. No skills needed as training will be given. You just need to be willing to learn and tall enough to reach the sink!*

### Challenge 2:

Here is what the jobs are and how much you will earn in each job. Has this changed your mind about which job you would prefer?

Job	Pay	Bonus
Job A - Car Washing	£3	Wash a neighbour or relative's car for £2 per car - this is not guaranteed!
Job B - Putting your washing away	£1 a day up to 3 times a week	Helping with hanging the washing on the line earn an extra £1 for every time this is done up to 3 times a week!
Job C - Washing the dishes after dinner every night	50p a day	At the weekend earn an extra 50p for dishes after Breakfast and Lunch on both days!

Pick one and work out how much you could earn in a Week, a Month and a Year!

2\*\*/3\*\*\* if you pick on with a bonus work out how much extra you could earn.

With your calculations we will work out what you can spend and save with your earnings later in the week.
