

Blank Fan Book Writing Frames

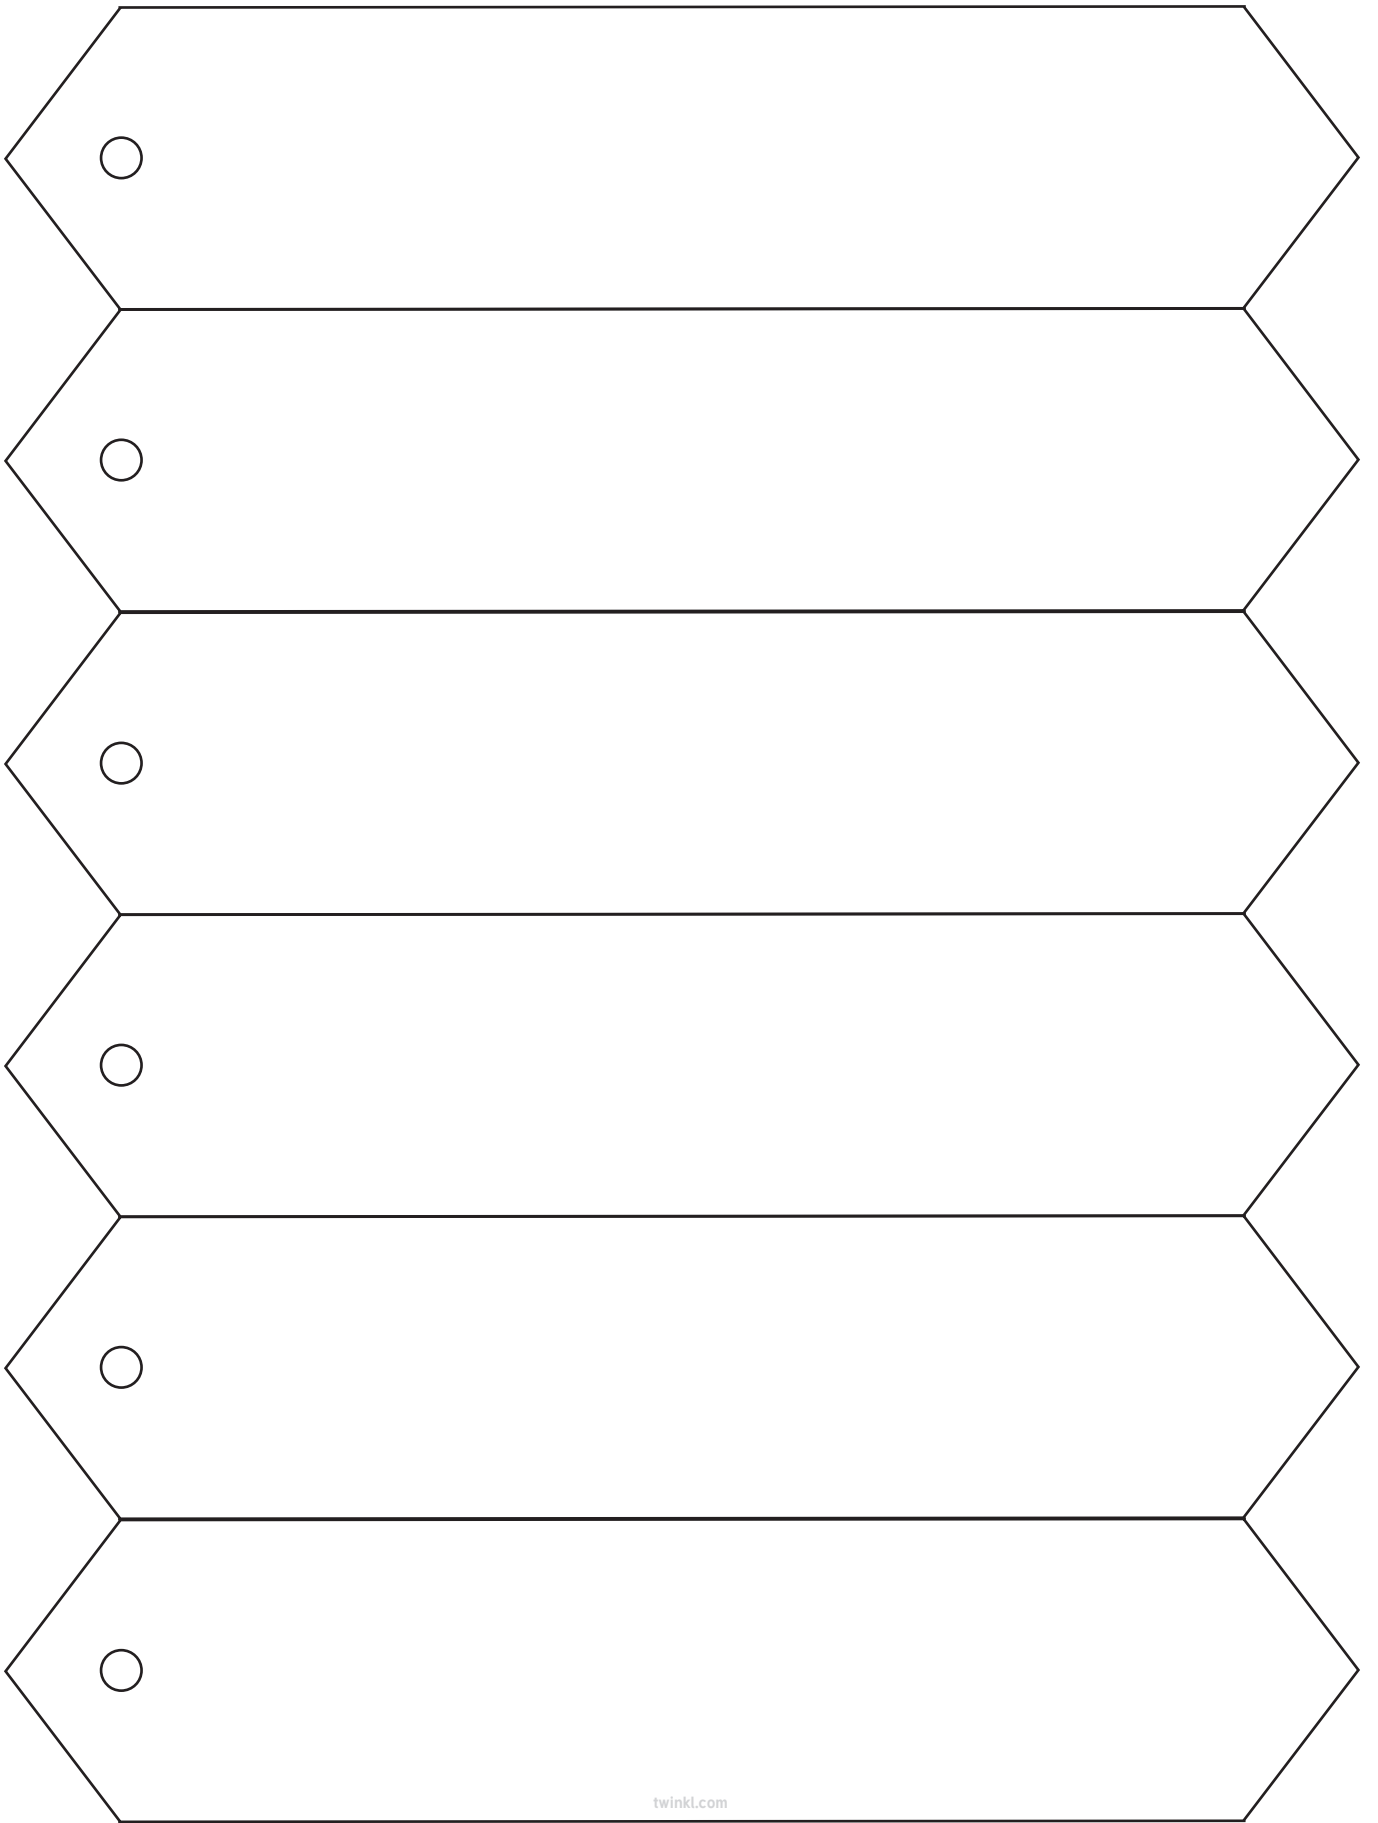

Choose which fan book would be perfect for your project and cut out all of the pages. Use a hole-punch to make holes as indicated and fasten your fan book together with a paper fastener. Use a pouch or a pocket to attach your fan book to your project.

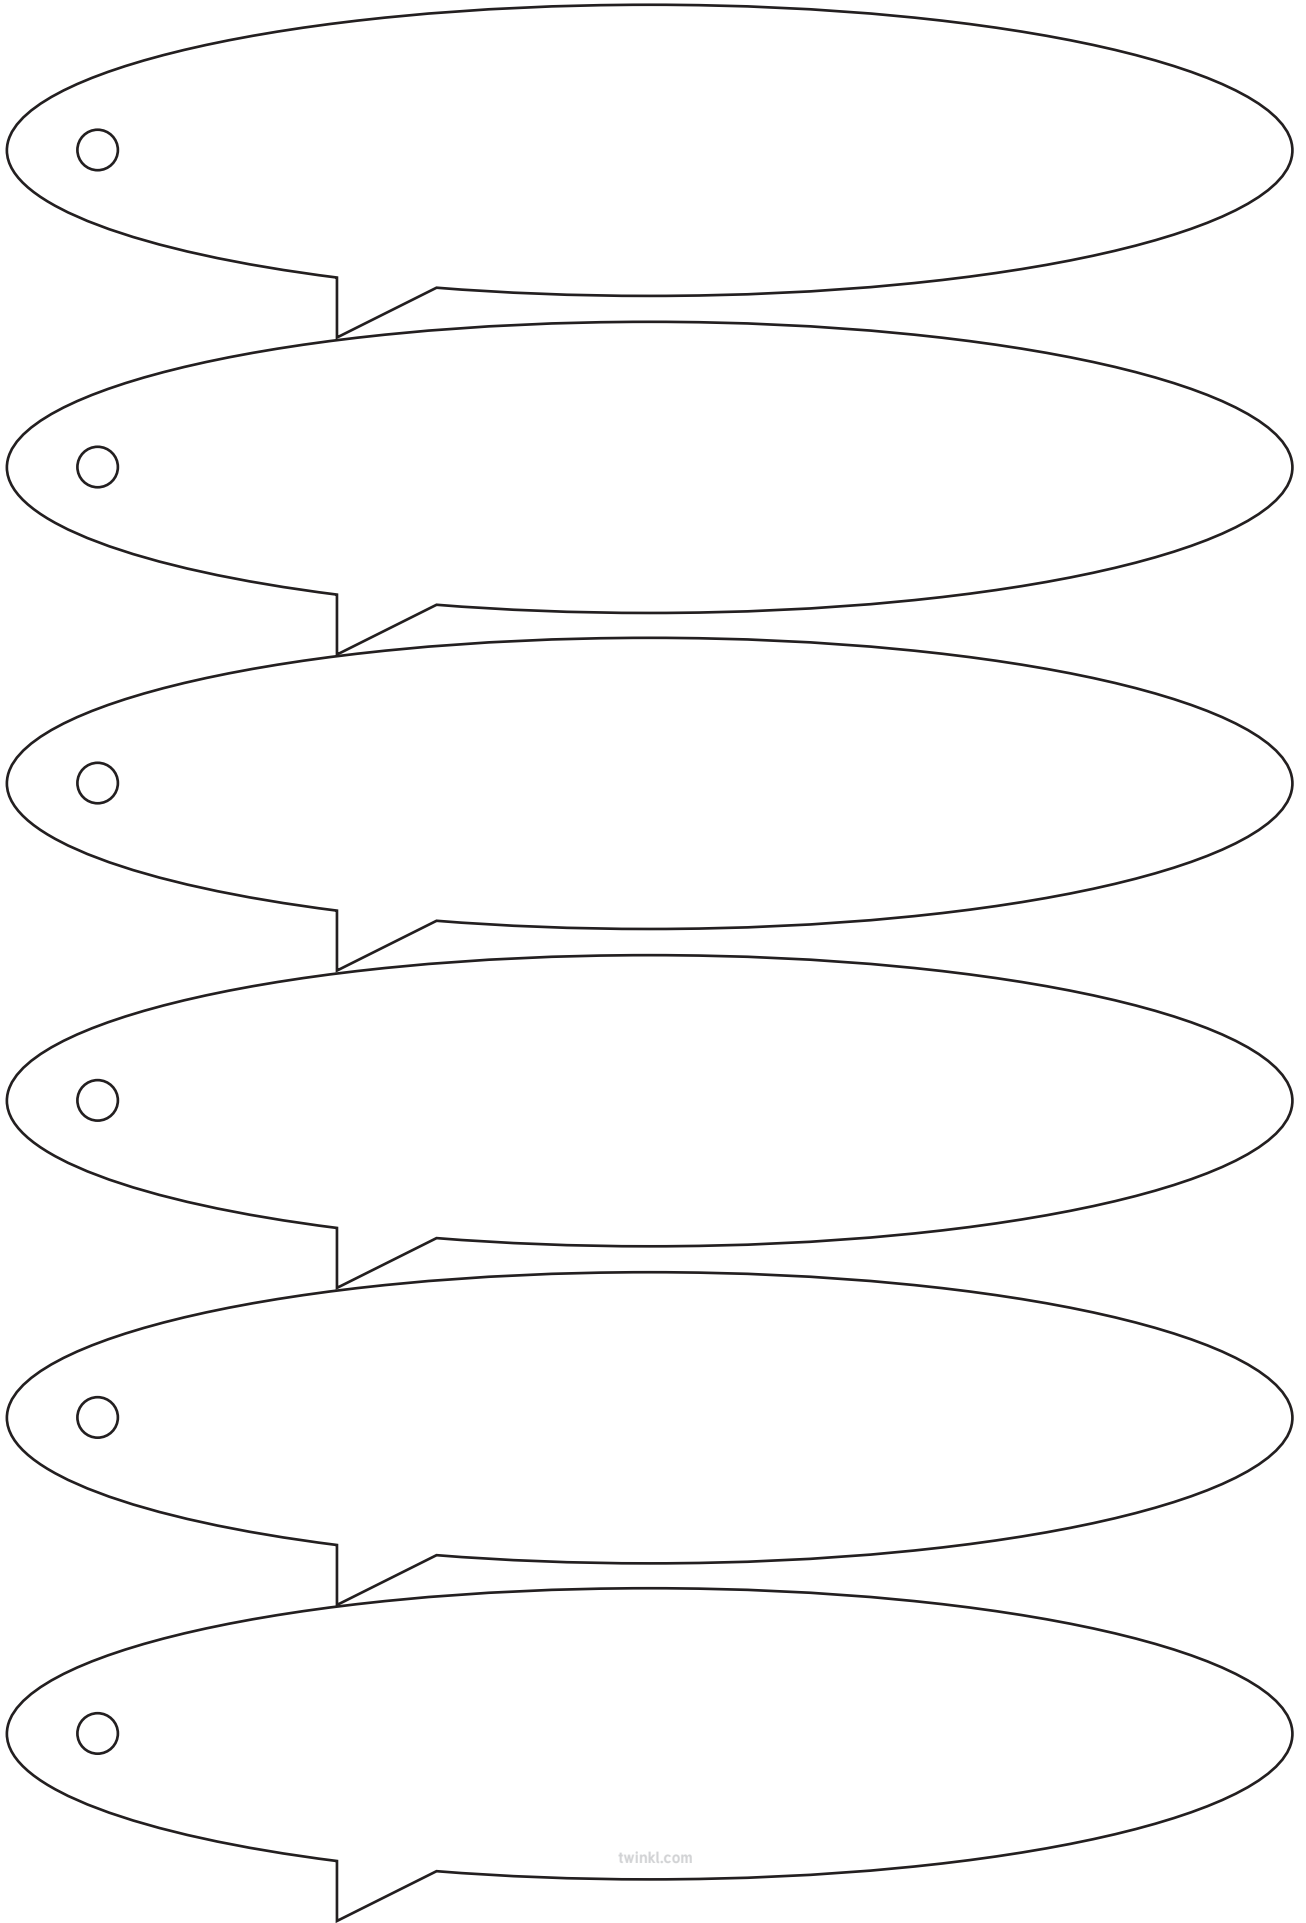

The image displays six identical, vertically stacked writing frames. Each frame is a rounded rectangle with a small circle on the left side, indicating where to punch a hole. The frames are completely blank, intended for students to write their project information on.
