

Maths

Today we will look at how we can use fractions as a form of data. We will look at some statements around a class and what it tells us about them. We will then make some statements using fractions about our own classes.

This lesson is live for all classes at 9am with their own class teacher

English

To write an explanation text about my invention.

This is a double lesson. It is yesterday's English work AND today's English work.

There is one set of slides with everything that you need for your work on both days.

There are 2 tasks for you to do; writing your explanation following your plan from yesterday, and creating a glossary at the end of your work.

Year 5 Home learning 03/3/21

Reading

Following Chapter 2, there were some tricky new words that many of you may not have understood.

What do the words mean? Write them into sentences of your own which will show that you understand them and can use them in context.

Foundation; Topic

To produce a detailed explanation of one of the great Islamic inventions or discoveries.

Looking back at the slides about inventions (slides 12, 13, 14), choose one of the following to research in more detail. Using the given sheet and more, can you produce a detailed explanation about the item?

You can present our information in writing, pictures or diagrams or even make a model.

Think about adding info about the scholar who invented them, a picture of the item and modern versions of the items today!
