

Homework for March

Over the next week, Year 3 will be studying Roman shield designs. As part of their studies, homework until Thursday 31st March will be to make a full-sized shield. Children may use a variety of materials to make their shields. In the past, we have had mainly painted cardboard ones, made from large cardboard box materials, various coloured foils for decoration, cardboard tubes or pieces of wood for handles and papier mâché designs on the fronts / sometimes small plastic bowls or foil pie-casings covered in paint /glue mixtures for the 'lumps' on the front of their shields. We would like the Roman shields to be approximately 1m high. Children can use a range of materials to make and decorate their shields according to their planned design. During this period, Reading and Spelling homework will continue as usual. Please ask us if you need any further guidance.

Thank you for your continued support,
The Year 3 Team
